

How Prepared Are You For A Security Breach?

What is ISO/IEC 27001:2013?

ISO/IEC 27001:2013 is the latest version of ISO/IEC 27001 for managing information security within an organization.

Rest assured that the ISO/IEC 27001 requirements are phrased in a way which allows greater freedom of choice on how to implement them regardless of the size of your organization or company.

Some of the concepts that this standard covers are as follow:

- Context of the organization
- Issues, risks and opportunities
- Leadership
- Communication
- Information security objectives
- Risk assessment
- Risk treatment
- etc.

Is Your Company At Risk?

With the emergence of new threats daily, organizations struggle to keep up in securing their information systems in every perspective from hardware and software to people.

As the organization grows larger, information system security becomes more difficult to manage. This puts the company at risk because the appearance of security loop-holes will incur losses, and even worse, damage to company reputation.

With LGMS' team of ISO experts, let us help you identify the risks in your company and achieve internationally recognized information security compliance.

With ISO/IEC 27001:2013, you can secure your company assets and ensure business continuity.

Certification Success Assurance

LGMS has been consulting and auditing multi-million dollars organizations since 2005. Based on our proven and effective implementation strategies, you can rest assured that your implementation process will be on time and on budget. LGMS shall ensure that your organization will be able to meet the certification requirements after the upgrade project.

How Can You Benefit?

The adoption of an information security management system such as ISO/IEC 27001 is a strategic decision for an organization.

Having the latest ISO/IEC 27001 certification is highly regarded proof of a reliable, defensible, standard based information security posture. This standard confirms both management and client that your organization is proactively managing its security responsibility.

Depending on the scope of ISMS, typically LGMS client will take 3 to 6 months to complete the upgrade transition.

This international standard can be customized to integrate with existing organization processes; allowing full scalability according to organization requirements.
