

Can Your Mobile Applications be Hacked?

An Attractive Target for Malicious Attackers

The explosive growth in mobile application technology over recent years has made it an attractive target for attackers. A successful compromise of these mobile applications can result in attackers gaining access to personally identifiable information (PII), credit card details, and other sensitive data.

With more than a decade of specialized cyber security testing experience, LGMS's Mobile Application Penetration Tests will identify both common and complex security vulnerabilities that may be residing within your mobile applications.

OUR COVERAGE

LGMS will help you to discover if attackers can:

- ▶ Bypass authentication to gain access to other users' accounts
- ▶ Perform unauthorized actions on behalf of other users
- ▶ Steal key secrets due to improper mobile platform usage
- ▶ Disclose other users' sensitive data
- ▶ Violate users' privacy by intercepting sensitive data
- ▶ Reverse engineer and make malicious modifications to your application
- ▶ Submit transactions that violate business logic

Mobile Application Penetration Testing

LGMS' Mobile Application Penetration Tests are customized and designed to suit each application's unique functionalities and business flows.

We ensure complete coverage of testing by utilizing techniques spanning across multiple layers

DELIVERABLES

LGMS will present a penetration testing report with the following:

- ▶ Executive Summary
- ▶ In-depth Application Vulnerability Technical Details
- ▶ Security Risk Rating (OWASP Risk Rating) and Prioritization of Findings
- ▶ Comprehensive Remediation Guidance
- ▶ Recommendations for Future Improvements

LGMS' VAPT deliverables are accepted as a baseline for TÜV TRUST IT's "Trusted Infrastructure" certification

Securing the Future

LGMS spearheads the cyber security industry by being the first in the country in various areas of specialization. Here are some of LGMS' latest achievements.

The leading cyber security expert in Asia and trusted by multinational corporations around the world, LGMS is a cyber security consulting company focused on delivering specialized cyber security assessments, consultation and advisory services.

Established in 2005, LGMS has since built a reputation for its integrity, values and best practices by providing world-class professional services to local, regional and international clients across various industries and backgrounds.

- 2017 Cyber Security Company of the Year
- First Center for Internet Security (CIS) Member Company
- First Cyber Security Company Certified in ISO/IEC 27001:2013
- First Cyber Security Company Certified in ISO/IEC 9001:2015
- First CREST Certified Penetration Testing Company
- First MILE2 Certified Training & Examination Provider
- First Payment Card Industry (PCI) Approved Scanning Vendor (ASV)
- First PCI Qualified Security Assessor (QSA) Certified with PCI ASV Status
- First PECB Certified Training & Examination Provider
- First TÜV Trust IT Accredited Tester
- 2019 IDC Report: Asia/Pacific Internet of Things Security Landscape and Key Vendors
- Common Criteria EAL2 Certification for LGMS Security Assessment Report Generator (LGMS Reporter) v1.0.0
- Cyber Security Assessor for SWIFT Customer Security Programme (CSP)

Asia Pacific's Leading Cyber Security Specialist
