

Security Posture Advisory & Assessment

Fortify Your Organization's Cyber Security Strength

Cyber security threats are causing organizations to be mindful of the significance of cyber security posture. Prime targets for hackers today include client data, the organization's intellectual property, proprietary information, and various types of data resources. Any undesirable cyber-attacks on these properties will cause substantial financial losses and harm to an organization's reputation.

By performing a cyber security posture assessment, you will get a realistic report of the current cyber security issues that cover weaknesses, risks, and loopholes within your organization.

LGMS Cyber Security Posture Assessment can help to quantify an organization's overall cyber security posture.

LGMS Cyber Security Posture Assessment focuses on identifying the organization's risk management and response capabilities. By performing cyber security posture assessment, you will get a clear perspective of your current cyber security strength and defense effectiveness within the organization.

Our Coverage

LGMS can help you to discover security loopholes and entry point weaknesses with the following:

- Identification of security vulnerabilities across the organization IT infrastructure
- Assess organization's servers, database and network devices based on best practices configuration
- Comprehensive internal and external network penetration testing
- Advise on emerging vulnerabilities and recommend actions to mitigate identified vulnerabilities
- Achieve improved compliance with regulatory and industry requirements (RMiT, PCI, ISMS, etc)

CYBER RISK DIAGNOSTIC

Build up a snapshot of an organization's Cyber risk footprint to rapidly distinguish and organize the most vulnerable components according to its business criticality

CYBER RISK MANAGEMENT

Address the Cyber risk lifecycle, performing risk identification and assessment, control testing, and remediation

CYBER RISK GOVERNANCE

Cover the development of cyber risk program, including strategies, techniques, assessment, and implementation

Three phases of LGMS Cyber Security Posture Assessment

Deliverables

LGMS will present a security posture assessment report with the following:

- Executive Summary
- In-depth Vulnerability Technical Details
- Overall Security Posture Risk Rating level
- Comprehensive Remediation Steps and Guidance
- Security Strategies and Roadmap for Future Improvement
